#### Specifications

##### Product

The insulation is a composite of an all-weather polyvinyl chloride (PVC) backing and a thick rubber based, pressure-sensitive adhesive. The product must be applicable at temperatures ranging from -18°C (0°F) to 38°C (100°F) without loss of physical or electrical properties.

The product must not degrade when exposed to various indoor or outdoor environments. It must also be compatible with all synthetic cable insulations and jointing compounds. When used in junction boxes, cable trays or gutters, connectors shall be over wrapped with at least one-half lapped layer of glass cloth tape or varnished cambric tape before applying the product. Or, the entire product build-up shall be over wrapped with two half-lapped layers of an adhesive-coated cloth tape. Where use involves direct burial or continuous submersion in water, the product shall be over wrapped with a minimum of two half-lapped layers of plastic electrical tape.
