

LED floodlight with PIR 220/360 white

EE600

Technical Properties

|                                      |                          |
|--------------------------------------|--------------------------|
| Supply voltage                       | 230 V AC                 |
| Frequency                            | 50/60 Hz                 |
| Max. transmission range              | 12m                      |
| Diameter of the floor detection area | 24 m                     |
| Time delayed range                   | 5s ; 15min               |
| Brightness measurement range         | 5/1000 Lux               |
| Sensitivity setting                  | yes                      |
| Connection type                      | 1 to 1,5 mm <sup>2</sup> |
| Operating temperature                | -20 to 40 °C             |
| Storage temperature                  | -20 to 60 °C             |
| Protection class                     | isol.class II            |
| Protection index IP                  | IP55                     |
