

# Kima Floor Mounting

Special mounting tape for Kima heating cables; Kima Green, Kima GG10 och Kima Turquoise. Kima Floor Mounting makes the heating cable installation very simple.

## Specifications:

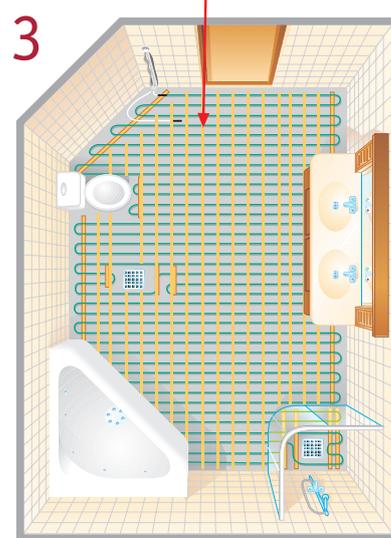

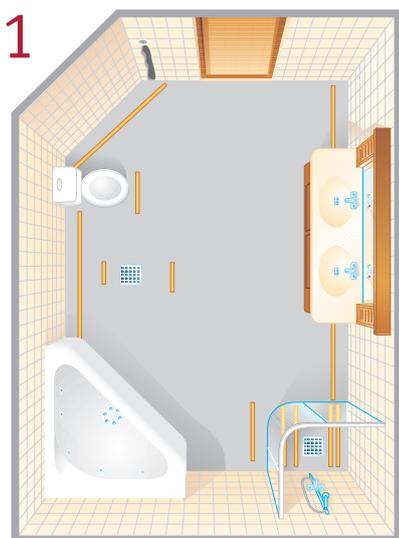

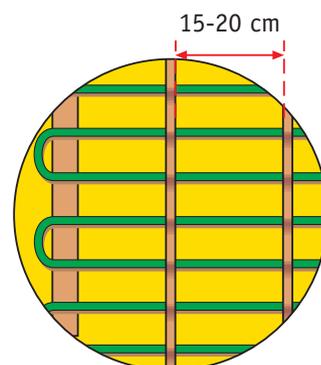

- Double adhesive tape 50 mm width and 25 m long to make it easier to get the right even pattern of the heating cable before it is finally fixed. (fig. 1)
- Fixing tape 15 mm width and 25 m long for final fixing of the heating cable. (fig. 2 and 3)
- Max operating temperature +70°C.
- Special glue compatible with the outer sheath of the heating cable.

Packages: 1x50 mm tape/package  
2x15 mm tape/package

## How to do it!

1. Put the 50 mm tape along the walls, around gutters and where the heating cable shall be bent. (Fig. 1)
2. Lay out the heating cable in accordance with the instruction by pressing it to the double adhesive tape. This method makes it very easy to correct the cable distances to finally fix the heating cable.
3. Use the fixing tape to finally fix the heating cable. (Fig. 2 and 3)
4. Cover the heating cable with compound or adhesive in accordance with the instruction.
