KNX dimming actuator, 2-gang 2 x 300 W/VA

GIRA Data sheet

Specification	Order No.	Packing unit	PS	EAN
DRA plus	2172 00	1	66	4010337082217

Features

- Dim actuator with integrated bus coupler.
- Switching and dimming of light bulbs, HV halogen lamps, dimmable HV-LED lamps, dimmable compact fluorescent lamps, dimmable inductive transformers with LV halogen or NV-LED lamps, dimmable electronic transformers with LV halogen or NV-LED lamps.
- Automatic or manual selection of dimming principle according to load.
- Idle-state, short-circuit, and excess temperature-proof
- Manual actuation of the outputs independent of the bus (building site operation also possible).
- Building site operation: Outputs can be operated manually without bus voltage with operating voltage only.

Functions

- Independent control of the dimming channels.
- Central switching function for control of all dimming channels.
- Delay for actively transmitted feedback messages following bus voltage recovery.
- Load type and dimming method can be configured: Universal (with automatic calibration procedure), electronic transformer/LV LED (capacitive/phase cut), conventional transformer/LV LED (inductive/phase cut), HV LED (phase cut) or HV LED (phase cut).
- Feedback for "switching" and "brightness value".
- Dimmable brightness range can be set.
- Dimming behaviour and dimming characteristics can be parameterised.
- Switch-on behaviour for a relative dimming command can be parameterised.
- Bulb-saving switch-on and switch-off
- Automatic setting and scaling of the dimmable brightness range when using universal power boosters.
- The performance of a dimming channel in the "OFF" state during reception of a relative dimming command can be parameterised (switching and dimming or no response).
- Alarm telegrams for short circuit, overload, and load failure.
- Feedback of connected load type.
- Block function or forced setting function can be parameterised for each output.
- Time functions (switch-on/off delay, staircase light function).
- Staircase light function with advance warning function via time-controlled reduction of lighting or activation of permanent lighting.
- Linking function and up to eight scenes per dimming channel possible.
- Elapsed operating time meter for recording switch-on time.
- Reactions after bus voltage failure and recovery can be set.

KNX medium: TP256

Rated voltage: AC 110 to 230 V, 50/60 Hz

Max. connected load (AC 230 V) per channel

- Light bulbs: 20 to 300 W - HV halogen lamps: 20 to 300 W - Wound transformer: 20 to 300 VA - Tronic transformer: 20 to 300 W - Wound transformer with NV-LED: 20 to 100 VA - electronic transformer with NV-LED: typically 20 to 100 W - HV LED lamps: typ. 3 to 60 W - Compact fluorescent lamp: typ. 3 to 60 W

Connected load (AC 110 V) per channel

20 to 150 W - Light bulbs: - HV halogen lamps: 20 to 150 W - Wound transformer: 20 to 150 VA - Tronic transformer: 20 to 150 W - Wound transformer with NV-LED: 20 to 50 VA - electronic transformer with NV-LED: typically 20 to 50 W - HV LED lamps: typ. 3 to 30 W typ. 3 to 30 W - Compact fluorescent lamp:

Connections

- KNX: Connection and junction terminal

- Load: Screw terminals

Connections: max. 4 mm²

Notes

- Power extension using Gira power boosters.
- Installation on DIN top-hat rail.
- VDE approval in accordance with EN 60669-1, EN 60669-2-1.

Scope of supply

- KNX connection and junction terminal included in the scope of supply.

Dimensions

Modular widths (MW): 4
