Video distributor

GIRA Data sheet

Specification	Order No.	Packing unit	PS	EAN
**************************************	1226 00	1	10	4010337229919

Features

- The video distributor is an active component for line adjustment of the video signal.
- The video distributor distributes the video signal of the door stations, DCS-camera gateways, and DCS-IP gateways to the home stations.
- The video distributor is required when the cable routing to the video components of the Gira door communication system is carried out as a branch line
- The video distributor ensures the proper terminating resistance to prevent possible reflections of the individual branches and the resulting picture disturbances.

The combination housing makes three mounting types possible

- Surface-mounted (in a standard junction box).
- Flush-mounted (in a device box).
- As a DRA device (with the included DRA adapter).

Technical data

Power supply: via system bus

Connections

- 2-wire bus IN: 2x screw terminals - 2-wire bus OUT: 6 x screw terminal

-25 °C to +70 °C Ambient temperature:

Notes

- The video distributor is cascadable. A total of up to 15 video distributors including video multiplexers can be used in one system.
- No further configuration is necessary during commissioning because the video distributor automatically adapts to the existing line network.
